

P-Chair

2013

Design : Umit Caglar

P-Chair has designed to unite the form and the material in a harmonious way. Although it may seem to have a sharp structure with its main line, it actually has a very feminine appearance. Moreover, the irregular angles of its back legs and back of the chair are some of its striking features. Its shape especially provides convenience in handling it, that is; its posture not being straight ensures simplicity in usage. On the other hand, P- Chair is not just designed for specific venues; on the contrary it is designed for houses, offices and public spaces.

Dimensions:

P: 54

L: 52

H: 74
